

Opening ".asc" LTSpice files in Graphic Spice

- **Graphic Spice** supports **LTSpice** formatted files for better compatibility with available market software.
- LTSpice command directives are not supported yet.
- Positioning might be a bit off given that **LTSpice** and **Graphic Spice** do not share the same paradigm with circuit design.

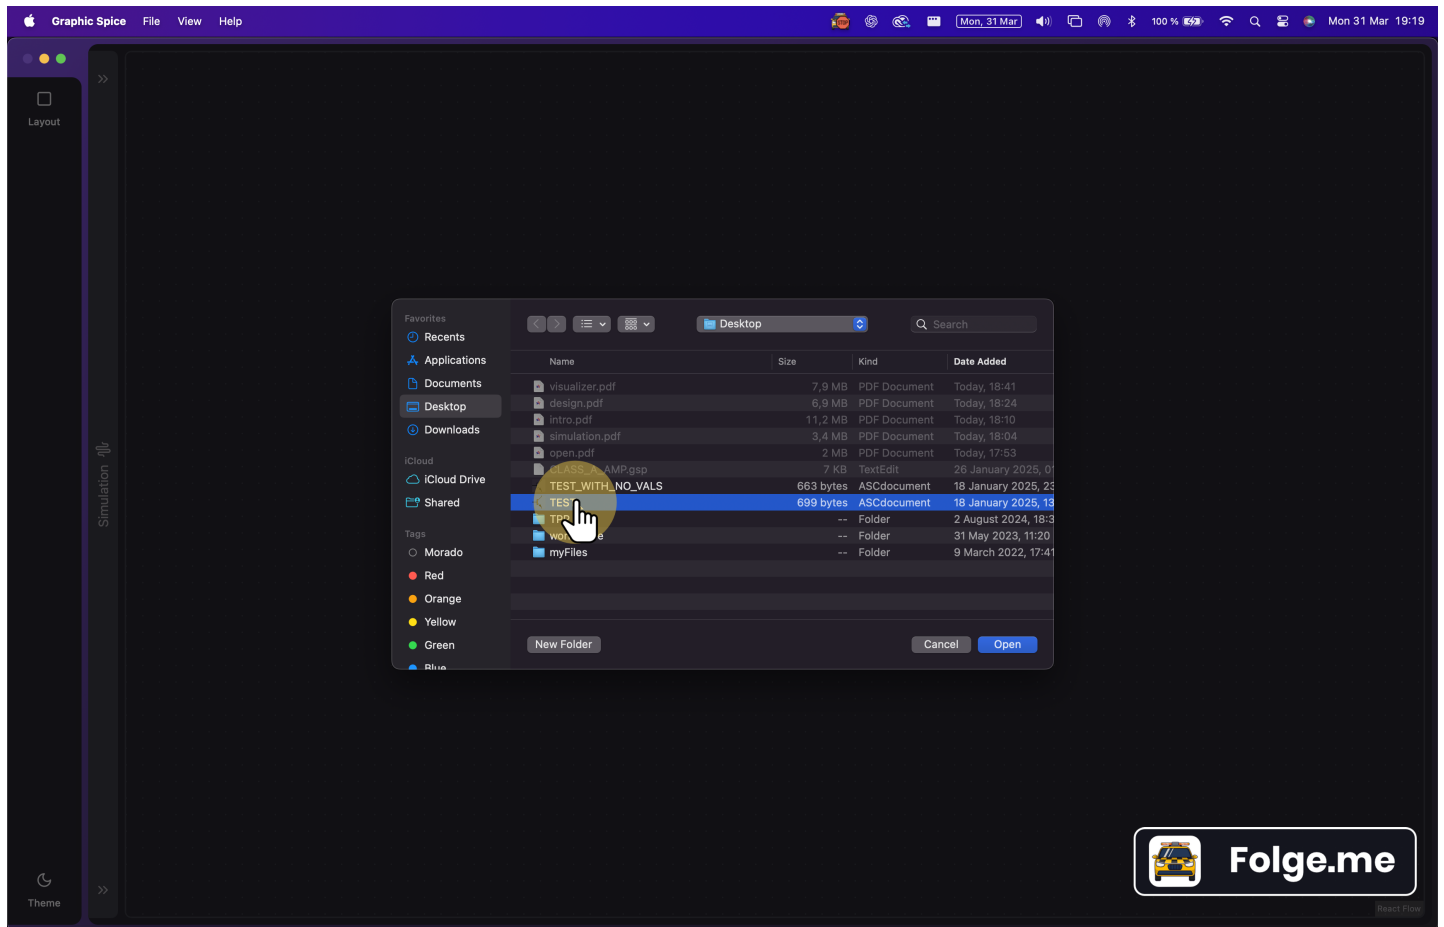

1 Select "File" from the menu bar

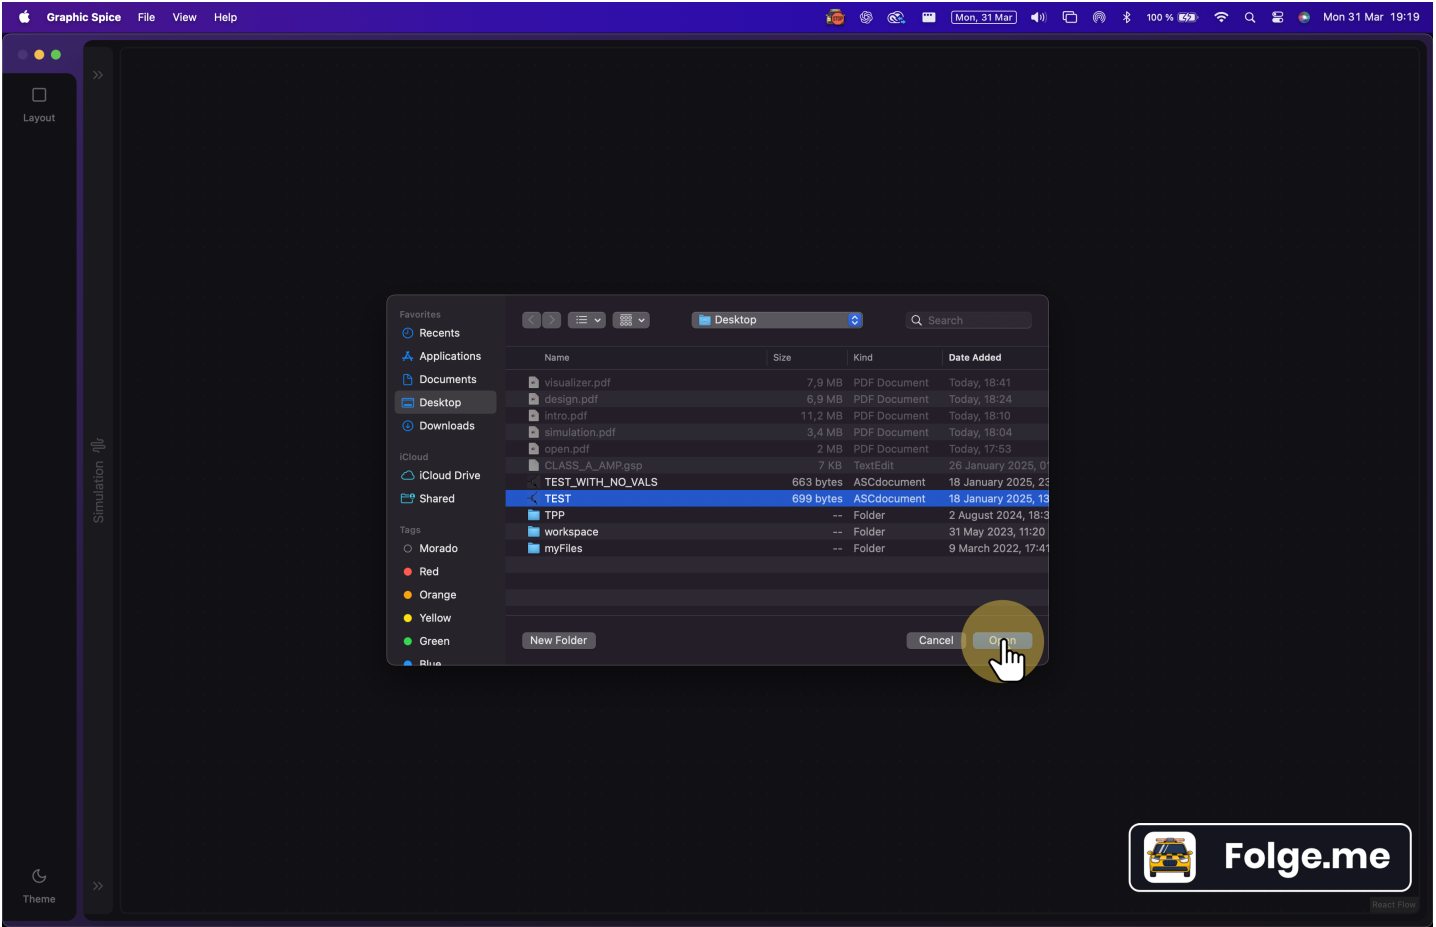

2 Inside the "Compatibility" sub-menu, select "LTSpice" -> "Open"

3 Select any ".asc" file

4 Confirm selection

5 Result
